ace records catalogue 2011

What have we been up to these last couple of years besides the usual round of cocktail parties? The much-acclaimed songwriter series has expanded considerably (it has its own section on pages 251-254). Besides adding the essential names of Barry Mann & Cynthia Weil we have searched further afield, adding such diverse tunesmiths as Chip Taylor, Neil Diamond, (more) Randy Newman, Lee Hazlewood, Ashford, Simpson & Armstead, Van McCoy and proved conclusively that “Bo Diddley Is A Songwriter”, if indeed that wasn’t already obvious.

Though it was inevitable that we would eventually get round to the London American story, the Ace twist to this tale sets the series well above other attempts in the past. London American was the academy of rock’n’roll with a semester in R&B for many of our more mature readers, and had a huge impact in the 50s and 60s on the budding beat musicians, helping the development of fine talents such as Georgie Fame, who we are pleased to add to the Ace roster as one of the supreme interpreters of black American music of his generation.

Talking of labels, one of the earliest Ace licenses was the other Ace Records (of Mississippi) and back at the dawn of re-issue we produced five volumes of the “Ace Story” on LP. We have now embarked on re-issuing the re-issues with extra tracks for CD and it gives us a nice warm glow to see them available again.

I fear we have neglected the blues in recent times and so, besides some nice sides on the Ace Story CDs, we were very pleased to issue Lightnin’ Hopkins’ “His Blues” as a soundtrack to Alan Govenar’s excellent biography. A couple of other book tie-in CDs were a musical journey through the Americas accompanying Garth Cartwright’s “More Miles Than Money” and “A Rocket In My Pocket” the companion to The Hipster’s Guide To Rockabilly written by Max Décharné - a rattling good read (Elvis did it) and a riotous listen. More CDs of the book of the T-shirt are on the way.

Other compilations off the beaten Ace track were two further “Theme Time Radio Hour” double CD sets ranging wide across the vast open plains of the music landscape and herding fantastic records drawn from Bob Dylan’s fascinating radio show. Another DJ close to our hearts was the late and very much lamented Charlie Gillett, who gave us an impeccable selection of tracks featured on his seminal Honky Tonk radio programme of the 70s. Before he died he left the template for the second volume and we will be pleased to present that in the near future.

“Where The Girls Are”, turned out to be France and Japan this time, as we went all International with some very chic 60s girl sounds from these two very diverse places.

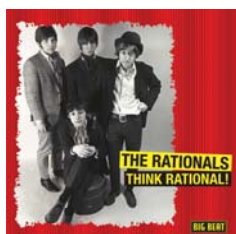

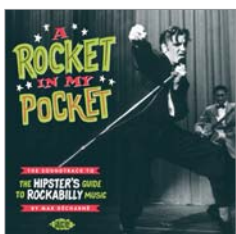

Thanks to the acquisition of the A-Square catalogue, Detroit’s finest psych’n’soul outfit the Rationals were comprehensively anthologised in a double CD with a side order of two long-players and one extended-play 45. A habit we will continue with in the future, so watch out for a wax attack.

The Kent label sells more soul than just about anyone else and the presses were working overtime, turning out classy 45s for the discerning dancer. A big hit musically and visually was the Sugar Pie DeSanto compilation, with a centre page spread that has to be seen and even then you might not believe it. We stayed down south to further explore Goldwax and Sounds of Memphis/XL and while we were at it inked a pact with Fame Records, the last of the truly great Southern Soul labels to be given the immense r-e-s-p-e-c-t due to it.

Also to look forward to is a new and exciting Latin series, much more from the recently acquired labels Music City, Flash and Doré and further rarities courtesy our good friends over at Tamla-Motown.

So the future does indeed look bright, with a full programme of great music in store for all tastes and later in the year a whole new web site to find out more about it.

the rest is history

What a long, strange, musical trip it has been from the heady days of our mid-70s origins in Chiswick Records and hand-stitched 45s to the elaborately crafted catalogue CDs of the 21st century Ace Records. In those 36 years we have put out one hell of a lot of music, paid a vast amount of royalties and we like to think have developed a distinctive style, often flattered by impersonation. We are the only indie catalogue company with our own post-production studios and the years of experience gathered by our crack team of engineers has left us peerless in the audio stakes.

If you are already familiar with Ace Records, then we will leave you in peace while you get your nose into 262 pages of catalogue heaven. We'll send in a rescue squad if we don't hear back from you in a couple of days.

If you are new to us, then approach with caution; there is a lot of music rattling around in there. At heart Ace Records covers post-war American music to the late 70s, roughly a span of 30 years. There is more to it, but more of that later. We'll start with the essentials. Compilations are often a good way to acclimatise and so here are some hot tips.

With many exceptions the Ace label covers the post-war 40s and up to what is generally accepted as the end of the 50s – 1963 and the advent of the Beatles. Our signature series, “The Golden Age of American Rock’n’Roll”, covers this period from the dawn of rock’n’roll in the mid-50s in some depth, documenting the more arcane hits from the Billboard charts of this period. This is Pop music as art, at times gauche, often naïve and frequently affecting with honest sentiment.

The period before the advent of rock’n’roll in the mid-50s is represented by some real fine blues, R&B, country and hillbilly. Look out for the great West Coast R&B compilation series “Central Avenue Scene” and “Mellow Cats ‘n’ Kittens” for some very in-the-pocket sounds. More outré are the Modern label “Down Home Blues Sessions” for those with a taste for the more primitive side of the blues. There are some great early country sides on King Records out of Cincinnati and we don't mean guys with big hats and no cows; these were real out of the soil types, who may not have had cows, but that was because they were too busy playin’ and singin’ about real life in a good bar somewhere. “Hillbilly Bop ‘n’ Boogie” nails it, though for a more rough-house version check out “Swingbillies”.

Three more distinctive types of music complete the 50s. Complementing the sound of rock’n’roll, there is doo wop – five guys in harmony, usually crooning in an echo and if the in-depth label compilations are too much, “Doo Wop Shop” makes for a great introduction. This was the hip hop of its day for black and white kids.

Those “Early Girls” were often swathed in softer, more melodic arrangements (though no one told Wanda Jackson about that) and the series of that name introduces them.

Twangin’ guitars and honkin’ saxes for the strictly instrumental set can be found on the “Teen Beat” series or go to “R&B Instrumentals” for something a little weightier.

The 50s was the time of the great independent labels: big, small and just plain pushy. We have something from all of them, but look out for Atlantic (R&B originators), Excello (very influential on the 60s beat groups), King (blues as well as country), Combo (one of the earliest black-owned labels), Flip (home of the original ‘Louie Louie’), DooTone for doo woppers, Old Town (Manhattan melodies and blues), Modern (the toast of the West Coast), Specialty (where the wild men of rock’n’roll hung out) and a host of other shoe-string operations run by all sorts of rough and smooth operators more often in hope than expectation. But they made some great records and in their day shook up the music business even more than the punk rockers did some 20 years later.

By the time the 60s had started officially and the Fab 4 arrived on the scene Phil Spector was in full flight with his Wall of Sound teen opera 45s and production values had improved by leaps and bounds. Check his “Early Productions” CD and the “Phil’s Spectre” series for his acolytes. All sorts of good, bad and flouncy girls can be found “Where The Girls Are”.

Soul music gradually took over from R&B as the hip black sound of the day (check the “Birth of Soul” series). For the first time black music started to sell in quantity to the white kids and Motown’s Berry Gordy drove this as much as anyone. The Ertegun brothers and Jerry Wexler were not slow on the uptake and Atlantic, with Stax Records on board, were soon doing for Southern Soul what Motown did for Detroit. Our “Take Me To The River” 3 CD set will tell you everything you need to know about this. Or for a smokier experience check out what was happening “At The Club”.

In Chicago, Chess Records made the move from being pretty much exclusively invested in the blues, turning Etta James from sassy R&B to a sophisticated soulstress. As the hits dried up for Chuck Berry and the big acts of the 50s, increasingly the female side of their roster produced the bigger hits. “Where The Girls Are Vol 3” tells it like it was.

At the same time as this was going on in the US, British teens were getting hip to the sound of black America. Some looked back a year or two to the halcyon days of the blues and were inspired to pick up guitars, sit behind drums and interpret the music from these exotic 45s increasingly coming out from across the Atlantic. Others danced to the irresistible beat of the sweet soul music.

In the centre of this attraction to all things American was Guy Stevens and his Sue label, and our four CDs, drawn from the records that Guy licensed from the US, paint a picture of what it meant to be young, well-dressed and musically hip in the mid-60s.

Georgie Fame, Sharon Tandy (who even cut records at Stax) and the Zombies, who went on to make the Paul Weller favourite “Odessey & Oracle”, were all inspired by the music that Guy and his fellow DJs were spinning “At The Club”.

It is amazing how this fanaticism for the music fed back into the US, not only in the beat groups going there and introducing the American audiences to their own music, but in defining it too. It was Dave Godin who suggested that it be Tamla-Motown over here and who coined the term Northern Soul. Maybe his greatest achievement in music came with his own notion of “Deep Soul (Treasures)”. Before his untimely death, Dave compiled four volumes of his vision of what he regarded as the most emotional music in any genre, matching the passion of the music with his passion for it (and left an outline for a fifth volume too).

The worlds of Guy Stephens and Dave Godin were remixed for the 80s with the emergence of Acid Jazz Records. A fleeting, intense and galvanising scene for a new generation, which spawned its own genre, label and bands, as its own take on the music of the previous 20 years developed. For the inspiration behind the scene the “Best of Acid Jazz” is a well-priced introduction and “London Street Soul” will tell you what it was churned into by the local hipsters.

Eventually this dovetailed with the natural next stop for those in pursuit of soul. By the dawn of the new century the funk was back in the spotlight, but without large fur-collared coats. “Super Funk” is how BGP defined its signature series.

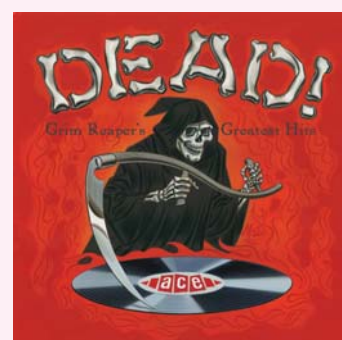

But let’s rewind a little in time and check out what the guys with the pudding basin hair-dos were up to in the late 60s. Look no further than “Uptight Tonight”, the definitive garage band compilation, cool and psychotic in equal measure.

Wind forward to the 80s again and while well-dressed proto-mods were doing Acid Jazz, rockabilly, filtered through a punk rock attitude, had crashed into 60s psych to produce an explosion called psychobilly, as carefully documented on the meticulously compiled “Rockabilly Psychosis And The Garage Disease” that you really must allow to splatter itself across your walls.

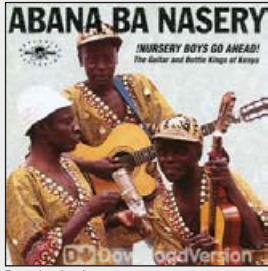

In these days of instant worldwide communication it is hard to remember how far away, strange and positively exotic America was, even back when we started the company. And, equally, the music was as if from another planet.

The ready availability on-line has demystified music to some extent, but it hasn’t informed enough. Generally the listening experience is enhanced by some well-mediated information and some great period images, both of which we supply in abundance. Our mission is to launch you on a journey through great swathes of fantastic music to entertain and to inform. The perfect combination of all these things can be found on our three volumes of double CDs that draw on the music played by Bob Dylan on his “Theme Time Radio Hour” broadcasts. A bench mark in catalogue re-issue.

If all this sounds too too serious, then hey, we got the lighter side of death (“Dead!”, “Still Dead!” and if you are very lucky, eventually “Dead Again!”), “Great Googly Mooga Moos” with some of the most nonsensical records ever made and for cat lovers everywhere the essential “Feline Groovy”.

GARY S PAXTON / Story: Hollywood Maverick

CDCHD 1073

Brian Wilson admired him. Phil Spector was scared of him. In the roll-call of 1960s Hollywood record men, quixotic producer Gary S Paxton was the most remarkable. Hollywood Maverick documents the oddball genius of Paxton's glory years with the hits 'It Was I', 'Alley-Oop', 'Monster Mash' and a bagful of amazing misses from 1958-65 featuring Thelma Houston, Sky Saxon, David Gates and many others.

GARY S PAXTON STORY / Hollywood Maverick

CDCHD 1073
029667014229

Brian Wilson admired him. Phil Spector was scared of him. In the roll-call of 1960s Hollywood record men, quixotic producer Gary S Paxton was the most remarkable. Hollywood Maverick documents the oddball genius of Paxton's glory years with the hits 'It Was I', 'Alley-Oop', 'Monster Mash' and a bagful of amazing misses from 1958-65 featuring Thelma Houston, Sky Saxon, David Gates and many others.

Volume 1 was genuinely big in Japan, where the sound and packaging was praised in effusive terms, and number 2 too will doubtless be received as a paradigm of programming and audio fidelity. Not for the faint hearted or indeed for the culturally myopic. Is this world music?
